

## How to config your new TL-WR940 Router

Things you need:

- Netzdaten-Page (if you don't have one contact: [wohnen-team1@stwm.de](mailto:wohnen-team1@stwm.de))

1. If your router isn't new perform a reset as shown in the manual
2. Connect to your router
  - 2.1 Wired: Using one of the yellow slots (Picture 1) and connect it to your computer.
  - 2.2 Wireless: Using the credentials written on the bottom of the router (Picture 2)
3. After connecting to the router, enter the interface of the router using a webbrowser (e.g. Safari, Chrome, etc.) using <http://tplinkwifi.net> (Picture 3 and 4)
4. Create a profile
5. Click on Network → WAN → Select „Static IP“ → Enter the IP-addresses from the Netzdaten-Page → Click Save
6. After configuration connect an ethernet cable with the blue slot of the router and the other end with the wall box , where it says „EDV“ (Picture 1.1)
7. Now you should have Internet.
